Education

M.Tech in Computer Science and Engineering

Indian Institute of Technology Bhubaneswar CGPA:7.89/10.00

Aug. 2021 - Jun. 2023

Odisha, India

B.Tech in Computer Science and Engineering

Kashi Institute of Technology, Mirzamurad CGPA:7.8/10.00

Aug. 2017 - Aug. 2021

Uttar Pradesh, India

Experience

ML/AI Intern

HPC Links Pvt. Ltd.

Bhubaneswar, India

Sept. 2022 - May. 2023

- Developed an Odiya NLP model with the ability to translate speech to text and vice versa.
- Collaborated with an AI engineer to create dependable, bug-free, and well-engineered code for PubMed.
- Enhanced the NLP model's efficiency, achieving a 98% success rate in extracting key entities from medical studies.

Indian Institute of Technology Bhubaneswar

Teaching Assistant, Computer Science and Engineering

Bhubaneswar, India

Oct. 2021 - Jun 2023

- Handled more than 100 students for assignment checking, grading, and setting the assignments.
- Contributed to doubt-solving sessions for students in programming and data structures.

Projects

Self-Attention Mechanism Guided NER in Research Documents | Dr. Debi Prasad Dogra July 2022 - May 2023

- Developing a new discovery method and algorithm to extract important entities in research papers.
- Identifying new entities and keywords through the use of a Transformer-based model.
- Create a model that is able to detect the important entities with an accuracy of 97%.

Real time Face Mask Detection | Dr. P.K.J.Mohapatra

Dec. 2021

- Engineered a supervised learning algorithm using MobileNetV2 architecture and OpenCV library.
- Derived a real-time lightweight model with low power and computation requirements.
- Developed model can successfully detect the presence of mask on face with an accuracy of 99%.

Real time Crack Detection using CNN | Dr. Niladri Bihari Puhan

Nov. 2021

- Proposed a deep learning algorithm using VGG16 architecture and OpenCV library.
- Detected real-time shortcomings in the structural integrity of a concrete surface.
- Optimized the machine learning model to achieve an accuracy of 97% on input data.

Lower Back Pain Detection | Dr. P.K.J.Mohapatra

Oct. 2021

- Determined the presence of lower back pain in patients utilizing an x-ray of the spinal cord.
- Implemented Random Forest on the basis of maximized performance achieving 97% accuracy.
- Analyzed multiple algorithms for maximum results on the basis of accuracy achieved in test data.

Smart Waste Management System | B.Tech. final project

May 2021

- Built classifier for wet and dry garbage to be segregated into different containers.
- Aggregated data from various sensors, channeled to and computed through Arduino module
- Reduced waste blending by 80% and minimized human intervention for separation.

Technical Skills

Programming Languages: Java, C/C++, Python

Developer Tools: Android Studio, Netbean, Jupyter Notebook, Google Colaboratory

Technologies: Android App Development, Machine Learning (ML), Deep Learning, OpenCV, Natural Language Processing (NLP), Git VCS, GitHub, Linux OS, Spring Framework

Certifications: Android Oreo Developer | Udemy , Linux for Absolute Beginners | Udemy

Extra-curricular Activities

- Solved more than 250 problems on various platforms combined like LeetCode, GFG and CodeStudio. April 2022
- Member of event team management (College Fest) 2018 - 2021
- Member of hospitality team in Ankuraan'18 (College Fest) Oct. 2018
- Head of registration desk of Anugoonj'19 (Cultural Fest) Feb. 2018
